

Deltacrin

Is a food supplement containing Iron and lysine with Melatonin and extracts of Soy and Carthamus.

Soy-life® is the most studied source of isoflavones extracted from soy germs and contains higher percentage of daidzein than other isoflavones. It is able to activate the wnt/beta-catenin pathway, promotes the anagen phase and inhibits the catagen phase of the hair in an androgen-independent manner. Iron is necessary to ensure a normal supply of oxygen to the scalp and for the biosynthesis of keratins. Lysine is an essential amino acid that influences the absorption of iron and zinc. Safflower is a potent inhibitor of testosterone 5-alpha reductase. Melatonin increases the percentage of hair in the anagen phase.

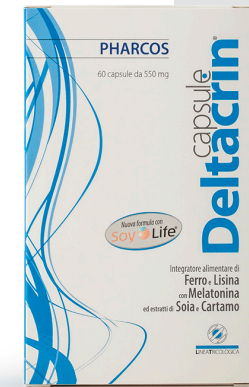

DOSAGE AND INSTRUCTIONS FOR USE

It is recommended to take one capsule daily, preferably in the evening before going to bed.
