

Erboflora 0-12

Probiotic indicated for children from 0-12 months to promote the balance of intestinal flora.

Food supplement with the probiotic
Bifidobacterium animalis ssp. lactis BLC1.

HOW TO USE

Screw the cap clockwise until the end of the stroke so that the powder falls down into the liquid; shake well and replace the cap with the dropper inserted in the package; take orally following the recommended daily dose. Once reconstituted, the vial should be stored in a fridge. Before each use, heat the vial in your hands for about 1 minute. It is recommended to take 10 drops a day. Do not exceed the recommended daily dose.
