PACKAGING
24 chewable
1 g tablets

Magaldracid combines compoundr with antacid properties and mucous-protective properties in a single formulation, to control the symptoms characteristic of gastro-esophageal and laryngo-pharyngeal reflux disease. Its effect is due to the presence of magaldrate, which neutralizes excess gastric acidity, magnesium alginate, which blocks the ascent of stomach acids, and a mixture of compounds (including hyaluronic acid), with adhesive, film-forming mucus properties that protect the mucous membranes from the effect of gastric acids. With just one product it is possible to act at several levels, by limiting gastric hyperacidity, impeding the passage of gastric acids towards the esophagus, trachea and larynx, and preserving the mucosa from the acid irritation that causes many complaints linked to acid reflux diseases.

DOSAGE

It is recommended to take 1 or 2 chewable tabletes after main meals and/or at bedtime. The tablets must be chewed or sucked in yout mouth before being swallowed. If the symptoms do not improve by 7 days, we recommend consulting a doctor.

LACTOSE FREE
GLUTEN FREE
OGM FREE

INGREDIENTS

MAGALDRATE, MAGNESIUM ALGINATE, SODIUM HYALURONATE, HYDROXYPROPYLCELLULOSE, XANTHAN GUM, HYDROLIZED MARINE COLLAGEN, NATURAL ORANGE FLAVORING, VEGETABLE MAGNESIUM STEARATE, PLASDONE K90 (POLYVINYL PYRROLIDONE), SUCRALOSE, ACESULFAME POTASSIUM, SORBITOL.
