Naturmar vials for nebulization

Nebulizing solution based on sea water and hyaluronic acid with a soothing and fluidifying action for the treatment of colds, rhinitis and sinusitis.

It is a natural product based on sea water and hyaluronic acid, useful for protecting and restoring the mucous membranes of the respiratory tract of children, adults and the elderly to normal physiological conditions. Ideal for routine cleaning and as a coadjuvant to the drug therapies.

It is indicated as an adjuvant in colds, sinusitis, rhinitis therapies, as it helps thanks to the synergistic action of sea water and hyaluronic acid to favour the hydration of mucous membranes and the fluidization of excess mucus, thus facilitating removal and drainage of secretions and the cleaning of the nasal cavities.

DOSAGE

For cleaning of the nasal cavities and soothing washing:

Remove a single-dose vial and gently open it by turning the cap until its removal. Tilt the head, gently insert the nozzle of the vial into the nostril and press lightly. After a few seconds, blow your nose or, if necessary, use a nasal aspirator to remove any secretions.

Repeat for the other nostril after tilting the head on the other side.

In case of partial use of the single-dose vial, close the vial again by using the appropriate cap (upside down = and store in the refrigerator. However, use the remaining product within 24 hours after first opening.

Frequency and duration of use

For a correct use it is advisable:

In infants to instill a few drops in each nostril several times during the day. In children form 1 to 3 years, perform complete washing with 1 vial once a day in adults, carry out complete washes with 1 vial twice a day. The duration of use depends on the evolution of symptoms and if necessary it can be used even for prolonged periods on the advice of your doctor.
